

# Year 5 Spring 2022

## Theme: Water under the Bridge

We will be exploring the key aspects of human and physical geography in relation to rivers, looking at the characteristics of a river, the different ways we use water and the impact of floods and droughts.

Our journey will begin with a stunning start day where our children will set up their own disaster and recovery centres to support their classmates fleeing from a 'flood.' We will also be designing and building bridges to see which structure can withstand the most weight, and looking at the real world implications of this.

We are changing the way we showcase our themes, so pop back at the end of Spring term to see our End-of-theme celebration work.
